

Feedback for RRMP Literature Review [Formative]

Tutor completing formative feedback: Karen Outram	Student number: Hrushik Tadvil
Details of any extensions etc:	Submission Attempt: Formative

Thank you for submitting your formative.

Choose either 'tools' or 'Techniques' as part of your title as you only have 2,000 words to complete the study. You need to keep the title focused. You don't have any listed research resources at the moment and so this won't help regarding finite direction. Get your research resources together and this will help you decide on a final title and direction. Similarly pick one topic for recognition; you mention several and so ensure that you are either choosing face or plant etc etc, not more than one subject matter. You also mention 'cloud computing' technologies – keep the study focused; decide what the focus is and ensure that you deep research that topic as 2,000 words is a very narrow word count.

***The below general information is circulated to all students from formative, looking forward to summative:**

For the actual summative, ensure that citation is occurring all the way through your content. In-text citation then needs to be reflected in a list of references at the end of the assignment. That list of references needs to be in alphabetical order at the end of the assignment.

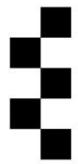

For summative ensure that your writing style is wholly formal and academic. Also remember to apply page numbers to your summative document. Ensure that your summative has a critical 'pros and cons' view of discussion, looking at both the positives and negatives of the research that you choose to engage with. It is really important not to just look at one side of research. The content of summative needs to examine different publications and look at different perspectives.

As discussed in live seminars and in student support on the online hub, research for this module is just from secondary research, [and so research that is already in the public domain]. No primary research, [interaction with actual people] is to take place in this module.

Wishing you the best of luck now for your actual summative,

With best wishes

Karen
